

CareerConnect — User Stories

AI Prompt: Generate 15 user stories for a job search and application tracking platform called CareerConnect, covering both job seekers and recruiters.

Job Seeker User Stories

User Story 1 — Create an Account

Story Points: 5

Priority: High

AI Generated User Stories and Features

As a job seeker, I want to create an account, so that I can access CareerConnect platform features.

AI generated Acceptance Criteria:

- The user can access a registration page.
- The user can enter their name.
- The user can enter a valid email address.
- The user can create a password.
- The user must provide all required information before registering.
- The platform displays an error if the email is already registered.
- The platform confirms successful account creation.
- The user can log in using their newly created account.

Team generated Additional Acceptance Criteria:

- Password must contain at least 8 characters
- Validate strength of password and reject weak password
- Valid and unique email address in the database
- User must accept the Terms of Service
- Email verification link is sent after registration

User Story 2 — Search and Save Jobs

As a job seeker, I want to search for jobs using keywords, location, and job type, so that I can find positions that match my career interests and save promising jobs for later.

AI generated Acceptance Criteria:

- The user can search by job title or keyword.
- The user can filter results by location.
- The user can filter results by job type.
- The user can view basic job details.
- The user can save a job on a list of saved jobs.
- The user can remove a job from their saved jobs.

Team generated Acceptance Criteria:

User Story 3 — Track Job Applications

As a job seeker, I want to track the jobs I have applied to and their application status, so that I can keep an organized record of my job search.

AI generated Acceptance Criteria:

- The user can add a job application to their application tracker.
- The user can record the company, position, and application date.
- The user can update the application status.
- The available statuses include Applied, Interview, Rejected, and Offer.
- The user can view all their applications in one place.
- The user can filter applications by status.

Team generated Acceptance Criteria:

User Story 4 — Create a Professional Profile

As a job seeker, I want to create a professional profile, so that recruiters can learn about my qualifications and experience.

AI generated Acceptance Criteria:

- The user can enter their name and contact information.
- The user can add their education.
- The user can add their work experience.
- The user can add their skills.
- The user can edit their profile information.
- The user can view their completed profile.

Team generated Acceptance Criteria:

User Story 5 — Upload a Résumé

As a job seeker, I want to upload my résumé, so that I can provide recruiters with information about my qualifications.

IA generated Acceptance Criteria:

- The user can upload a résumé file.
- The platform accepts supported résumé file formats.
- The user can view the name of their uploaded résumé.
- The user can replace an existing résumé.
- The user can remove their résumé.

Team generated Acceptance Criteria:

User Story 6 — Apply for a Job

As a job seeker, I want to apply for a job through CareerConnect, so that I can submit my application to a recruiter.

IA generated Acceptance Criteria:

- The user can select an available job posting.
- The user can click an Apply button.
- The user can select a résumé for the application.
- The user can submit the application.
- The platform confirms that the application was submitted.
- The application appears in the user's application tracker.

Team generated Acceptance Criteria:

User Story 7 — Receive Application Notifications

As a job seeker, I want to receive notifications about my applications, so that I know when there are updates from recruiters.

IA generated Acceptance Criteria:

- The user receives a notification when an application status changes.
- The notification identifies the relevant job.
- The notification displays the new application status.
- The user can view their notifications.
- The user can mark a notification as read.

Team generated Acceptance Criteria:

User Story 8 — Manage Saved Jobs

As a job seeker, I want to manage my saved jobs, so that I can easily return to positions that interest me.

IA generated Acceptance Criteria:

- The user can view all jobs saved.
- The user can open a saved job posting.
- The user can remove a saved job.
- The platform indicates when a saved job is no longer available.
- The user can access saved jobs from their dashboard.

Team generated Acceptance Criteria:

User Story 9 — View Recommended Jobs

As a job seeker, I want to receive job recommendations based on my profile and skills, so that I can discover relevant opportunities.

IA generated Acceptance Criteria:

- The platform can use the user's listed skills to generate recommendations.
- Recommended jobs are displayed on the user's dashboard.
- The user can view the details of a recommended job.
- The user can save a recommended job.
- The user can apply for a recommended job.

Team generated Acceptance Criteria:

Recruiter User Stories

User Story 10 — Create a Recruiter Profile

As a recruiter, I want to create a recruiter and company profile, so that job seekers can learn about my organization and hiring activities.

IA generated Acceptance Criteria:

- The recruiter can enter their name and contact information.
- The recruiter can enter the company name.
- The recruiter can add a company description.
- The recruiter can add company information.
- The recruiter can edit their profile.
- Job seekers can view the recruiter's company profile.

Team generated Acceptance Criteria:

User Story 11 — Post a Job

As a recruiter, I want to create and publish job postings, so that qualified job seekers can find available positions.

IA generated Acceptance Criteria:

- The recruiter can enter a job title.
- The recruiter can enter a job description.
- The recruiter can specify the location.
- The recruiter can specify the job type.
- The recruiter can specify required skills or qualifications.
- The recruiter can publish the job posting.

Team generated Acceptance Criteria:

User Story 12 — Manage Job Postings

As a recruiter, I want to manage my job postings, so that the information available to job seekers remains accurate and up to date.

IA generated Acceptance Criteria:

- The recruiter can view their published job postings.
- The recruiter can edit a job posting.
- The recruiter can close a job posting.
- The recruiter can delete a job posting.
- Closed jobs are no longer available for new applications.
- The recruiter can see whether a job is active or closed.

Team generated Acceptance Criteria:

User Story 13 — View Job Applicants

As a recruiter, I want to view applicants for my job postings, so that I can review candidates and identify people to consider for the position.

IA generated Acceptance Criteria:

- The recruiter can view a list of applicants for each job.
- The recruiter can view a candidate's profile.
- The recruiter can view a candidate's résumé.
- The recruiter can see the date the candidate applied.
- The recruiter can sort or filter applicants.
- The recruiter can select an applicant to review their details.

Team generated Acceptance Criteria:

User Story 14 — Update Candidate Application Status

As a recruiter, I want to update the status of a candidate's application, so that candidates can be informed about their progress in the hiring process.

IA generated Acceptance Criteria:

- The recruiter can select an applicant.
- The recruiter can change the applicant's status.
- Available statuses include Applied, Interview, Rejected, and Offer.
- The new status is saved to the application.
- The candidate can see the updated status.
- The candidate receives a notification about the status change.

Team generated Acceptance Criteria:

User Story 15 — Search for Candidates

As a recruiter, I want to search for candidates based on their skills, education, and experience, so that I can find candidates who meet the requirements of my job postings.

IA generated Acceptance Criteria:

- The recruiter can search for candidates by skill.
- The recruiter can filter candidates by education.
- The recruiter can filter candidates by experience.
- The recruiter can view matching candidate profiles.
- The recruiter can open a candidate's résumé.
- The recruiter can save or shortlist a candidate.

Team generated Acceptance Criteria:

User Story 16 — Communicate with Candidates

As a recruiter, I want to communicate with candidates through CareerConnect, so that I can provide information about interviews and other hiring steps.

IA generated Acceptance Criteria:

- The recruiter can select a candidate.
- The recruiter can send a message to the candidate.
- The recruiter can view previous messages.
- The candidate receives a notification when a new message is sent.
- The candidate can reply to the recruiter.
- Messages are associated with the relevant job application.

Team generated Acceptance Criteria:
