

Here are **15 user stories** for **CareerConnect**, organized by user roles (Job Seekers and Recruiters) and categorized under core epics.

They are structured using the standard agile format: *"As a [type of user], I want to [do something], so that I can [achieve a benefit/value]."*

Epic: Job Seeker Authentication & Profiles

- **Story 1: Account Registration & Role Assignment**
As a **new visitor**, I want to **register an account and select my role (Job Seeker)**, so that I can **access features tailored entirely to my job hunt**.
- **Story 2: Profile Customization**
As a **job seeker**, I want to **fill out my profile with my contact details, skills, and work history**, so that **recruiters can easily find me and assess my qualifications**.
- **Story 3: Secure Session Login**
As a **registered job seeker**, I want to **securely log in with my email and password**, so that **my private application data and resumes remain protected**.

Epic: Resume & Document Management

- **Story 4: Resume Upload**
As a **job seeker**, I want to **upload my resume in PDF format to my profile**, so that I can **quickly attach it to multiple job applications**.
- **Story 5: Multiple Resume Management**
As a **job seeker**, I want to **store and label different versions of my resume (e.g., Tech Resume, Manager Resume)**, so that I can **tailor my application to specific job types**.

Epic: Job Search & Discovery

- **Story 6: Keyword & Filter Search**
As a **job seeker**, I want to **search for jobs using keywords, location, and role type**, so that I can **quickly narrow down listings that match my expertise**.
- **Story 7: Saved Jobs List**
As a **job seeker**, I want to **bookmark or "favourite" interesting job postings**, so that I can **review them later and apply when I am ready**.

Epic: Application Submission & Tracking

- **Story 8: Application Submission**
As a **job seeker**, I want to **click an "Apply" button on a job post to submit my profile and selected resume**, so that the **recruiter receives my application instantly**.
- **Story 9: Visual Tracking Dashboard**
As a **job seeker**, I want to **see a dashboard layout tracking my application statuses (Applied, Interviewing, Offered, Rejected)**, so that I can **easily visualize the progress of my job hunt**.

- **Story 10: Automatic Deadline Reminders**
As a **job seeker**, I want to **receive notifications or reminders for upcoming application deadlines**, so that I **never miss an opportunity due to poor timing**.

Epic: Recruiter Job Posting & Management

- **Story 11: Create & Edit Job Postings**
As a **recruiter**, I want to **fill out a form to publish new job opportunities with titles, requirements, and descriptions**, so that **qualified job seekers can view and apply to them**.
- **Story 12: View Applicant List**
As a **recruiter**, I want to **see a centralized list of all candidates who applied to my active job postings**, so that I can **efficiently review their submissions in one place**.
- **Story 13: Download Candidate Resumes**
As a **recruiter**, I want to **click a link to view or download a candidate's attached PDF resume directly from my dashboard**, so that I can **evaluate their background offline or share it with my hiring team**.
- **Story 14: Update Application Status**
As a **recruiter**, I want to **change a candidate's application status (e.g., move them from 'Applied' to 'Interviewing')**, so that **the system automatically updates the job seeker's tracker dashboard**.
- **Story 15: Close Job Postings**
As a **recruiter**, I want to **archive or close a job posting once the position has been filled**, so that I **stop receiving new applications and job seekers know the role is no longer available**.

Would you like me to help you take some of these user stories and:

- Break them down into **Acceptance Criteria (Given-When-Then)?**
- Convert them into **GitHub Issues** text that you can copy and paste straight onto your team's **GitHub Project Board**?
- Design the **MySQL database tables** needed to support the job application tracking system?
