

AI Log Sprint 1

Task 1: Completing user login

Purpose of AI Use: Assistance with coding and understanding login validation, password verification, and role-based redirects.

Chat Link: Codex project conversation. Public share link not yet added.

AI-Suggested Content: Generated changes for email normalization, bcrypt password verification, invalid-credential handling, and role-based dashboard redirects.

Validation: Tested login for job seekers and recruiters, invalid credentials, dashboard access, and logout. The PR was also reviewed by a teammate.

Decision: Adapted the suggested implementation to the project and incorporated teammate review feedback.

Reflection: AI helped explain the login flow and connect it with the existing registration code.

Responsible Person: Yacine Zribi
